Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP'760.

The EP'760 discloses the basic structure claimed. See claims of EP'760. The structure contains a decorative layer, a core layer and an electromagnetic energy absorbing layer. The laminate is a high-pressure laminate. Heat is used to bond the laminate. The EP'760 does not specifically teach the use of induction heat. However, it would have been obvious to one having ordinary skill in the art at the time of the invention to use induction as means of heating since such is commonly known in the art. Furthermore, it would have been obvious to optimize materials such as for the use in substrate layer, polymer layer, adhesive layer or decorative layer since such would improve properties of the laminate. It is noted that paper and metal is disclosed in the applied reference. It would have been obvious to select shape and kind of material to improve the individual layers of laminate.

Art Unit: 1773

The amendments and remarks filed by Applicants have been fully considered. The claims, however, remain unpatentable in view of the new grounds of rejections based on EP'760 reference cited in European Search Report.
